

## Strate fixed handle Collection

**Unashamedly contemporary design, taut, minimalist and user-friendly structure, technical innovation and high-performance, the CRISTEL STRATE range is another step towards perfection.**

Handles in cast stainless steel are securely welded to the bodies of "L" saucepans and skillets with a broad, enveloping thermodiffuser base. They will be riveted to the pans so as to allow remoulding of the Excalibur non-stick coating.

Flat glass covers, with comfortable, fold-flat handles (for easy storage) are an elegant complement to the pure lines of this collection.

- Body in 18/10 brushed finish stainless steel
- Wide, enveloping, capsulated, high-performance 3-layer base (18/10 stainless steel, aluminium, stainless steel special for induction hob)
- Handles in comfortable stainless steel, welded to the saucepans and riveted to the pans to allow remoulding of the Excalibur non-stick coating
- Dishwasher safe
- Can be used on all heat sources including induction and oven.
- Available in all stainless steel or non-stick Excalibur coating
- Can be hung up by the handle for easy storage.
